

## **Environmental Policy**

We recognise that, as a manufacturer of a wide range of seating, we have a responsibility to do what we can to make sure we mitigate to the fullest extent our contribution to the erosion of the quality of our natural habitat.

It is our aim to lead by example and make Rhubarb a model company renowned for environmental best practice. As such we are continually working towards minimising our environmental impact and doing our utmost to reduce our carbon footprint as much as practicable.

To achieve our aims we will establish sound environmental management by:

- Ensuring that, as a minimum requirement, we conduct our business in full compliance with all relevant legislation, regulations and environmental codes of practice applicable to our Managing, so as to minimise any pollution of the environment.
- Protecting the environment from our activities, minimising any potential and actual pollution
- Seeking to continually improve our environmental performance and our environmental management system by setting and reviewing environmental aspects, objectives and targets, making environmental improvements and monitoring performance by regular review
- Considering any environmental issues as part of our normal decision-making process
- Developing a relationship with suppliers and customers to encourage them to manage their environmental impacts more effectively
- To continuously review our Environmental Policy and immediately react to any significant changes affecting either our Managing or behaviour.

Our immediate environmental objectives are:

- Waste reduction and recycling
- Sustainable sourcing and reduction of product and component carbon footprint
- Mitigating energy consumption

This policy will be made available to all interested parties on request.
